DETAILED ACTION

1. Claims 2-20 and 23-29 are pending in this communication filed 10/13/04 entered as Request for Continued Examination after a BAPI decision.

- 2. The IDS filed 06/17/04 has been reviewed and considered.
- 3. The Drawings filed 10/13/04 have been reviewed and considered.

Continued Examination Under 37 CFR 1.114

4. A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/13/04 has been entered.

Claim Rejections - 35 USC § 101

5. Claims 23, 24, 25, and 26 and claims 2-10, 13-15, and 17 that depend there from are rejected under 35 U.S.C. 101 as non-statutory. The method claims as presented do not claim a technological basis in the body of the claim. Without a claimed basis, the claim may be interpreted in an alternative as involving no more that a manipulation of an abstract idea and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the body of the claim at least one structural/functional interrelationship which can only be computer implemented is considered to have a

Art Unit: 3624

technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) –used only for content and reasoning since not precedential]. Claim 26 is simply data per se and needs to be placed on a medium like claim 27 to overcome the 35 U.S.C. 101 rejection. Claim 26 is considered data per se needs to be put on a medium like claim 27.

Claim Rejections - 35 USC § 102

6. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27-29 are rejected under 35 U.S.C. 102(e) as being anticipated by (US 5,968,109) Israni et al, hereafter Israni.

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

With respect to claim 27, Israni teaches, (a) data entities each of which represents a geographic feature in a geographic region (col. 5, lines 29-45 and line 64 – col. 6, line 67), wherein the data entities are separated into a plurality of parcels (col. 7, lines 61-col. 8, line 50), wherein each parcel contains a subset of the data entities (col. 8, line 51-col. 9, line15), wherein the subset of data entities in each parcel represents

Application/Control Number: 09/016,002

Art Unit: 3624

those geographic features ... wherein an improvement comprises: (col. 10, lines 11 –col. 11, line 46), (b) a plurality of indexes, each of which is associated with a separate one of the plurality of parcels and where the index relates each of the data entities in the subset of data entities ... (col. 10, lines 11 –col. 11, line 46), and the geographic database is stored on a computer readable storage medium (col. 19, lines 23 –col. 20, line 64).

With respect to claim 28, Israni teaches, wherein said data entities represent segments of roads (col. 6, lines 36-63)

With respect to claim 29, Israni teaches, a plurality of parcels, each of which contains a separate portion of the data records, ... (col. 21, line 45 –col. 22, line 18 and col. 24, line 23 –col. 25, line 61), wherein an improvement comprises: a plurality of first indexes each of which is associated with a plurality of parcels, ... (col. 19, line 23-col. 20, line 64), and the computer readable data structure means identifies which of the data records represent segments of roads located in any specified sub-area of any specified area (col. 28, lines 43 –col. 29, line 11).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tamai et al (US 5,731,978) disclosed vehicle navigation through recognition of geographical region types in a map database.

Shinsangyokaihatsu, Kabushiki Kaisha et al (EPO 0330787 A2) disclosed a navigation system that may be a CD storing data representing a standard map of a particular are that is required for guidance.
